Linear Equations Group Work

Within your group, you will create a unique question on one of the following topics (given to you by the teacher). You question will be written on a piece of chart paper.

Topics:

1. Question involving parallel lines
2. Question involving perpendicular lines
3. Question involving point and slope
4. Question involving two points
5. Question involving information taken from two separate equations
6. Question involving a positive x-intercept and negative slope
7. Question involving a negative y-intercept and a point in the third quadrant
8. Question involving a point in the first and fourth quadrant
9. Question involving undefined slope
10. Question involving zero slope and positive y-intercept
